# Adding Trusted Sites

Edmentum

How to Add Trusted Sites

The Trusted Sites list allows you to provide easier access to certain Web sites while maintaining higher security when using other sites. Note: We support the latest versions of Edge, Chrome, Firefox, and Safari.

If the Trusted Sites are not added to your browser you may experience some of the following issues:

- Blank white screen appears when trying to launch lessons
- Lessons stuck on "Loading" screen or "Access is denied"
- ERROR: "403: forbidden; access denied"
- ERROR: "The system has encountered a significant error" launching content
- ERROR: "Your browser is not supported"

Getting Help with Setup

These trusted site configurations can typically be completed by your IT administrator, technology coordinator, or someone with administrative access to your browsers and network settings. If you need assistance with any of these steps or encounter issues during setup, please contact our support team at support@edmentum.com for guidance.

A Note About IP Addresses/Ranges

Edmentum recommends allowing sites by domain and does not recommend configuring your network and workstations with IP addresses or ranges. In the event that Edmentum updates or expands our use of IP addresses, your configuration may stop working until updates to your appliances and workstations are complete.

Steps for Adding Trusted Sites by Browser

Google Chrome

- [Chrome Enterprise and Education](#)
- [Change site settings permissions](#)

Mozilla Firefox

- Add special permissions to specific websites using the [Firefox Page Info](#) window.

Safari

- [Change settings in Safari on Mac](#)
- [Change App Store, Media, Web, & Games settings in Screen Time on Mac](#)

Microsoft Edge

- [Edge Enhanced Security](#)
- Use policies to [configure how Microsoft Edge runs](#) in your organization

iOS devices

- [Content and Privacy Restrictions](#)

Trusted Sites Lists

Edmentum Product Users: Add each of the following URLs to the list of trusted sites.

NOTE: Chrome requires a slightly different URL format for adding trusted sites. Trusted sites for Chrome should be entered as [*.]examplesite.com.
