

Get to Know Exact Path

Your learner's school is using Exact Path this year. It's an online program from Edmentum for Reading, Language Arts, Math, and — in some schools — Science and Social Studies. It's a learning journey of lessons, practices, assignments and assessments based on specific strengths and needs. It's designed to work alongside their teacher, not replace them.

Watch the Video

A 4-minute explainer video about what the Exact Path program does, and what your learner sees on screen while they're learning.

What your learner may be using

Exact Path has three parts, and schools pick which ones they use. Your learner may use one, two, or all three. Their teacher can tell you which.

- **Insights** is a short online assessment, usually given a few times a year. It isn't graded, and there's nothing to study for.
- **Growth** is a set of lessons and practice built from those results, aimed at the skills your learner is ready for next.
- **Proficiency** is practice on the grade-level standards their school is teaching this year, in math, English language arts, science, and social studies for grades 3–12.

Rewards along the way

Exact Path keeps a record of what your learner has earned and provides them with [rewards](#): trophies for the skills they've mastered, badges for completing challenges set by their teacher, and — in some instances — medals for assignments they've performed well on. For questions about your learner's specific progress, their teacher is always the best place to start.
