

Students: Guided Notes

These instructions show you how to access guided notes. In order to edit them, you'll want to save the PDF to your computer or device. If you don't save it, your work will be lost when you close the PDF.

1. Open a course module.

2. Select the **Resources** button on the menu (it looks like a file folder). Select the **guided notes**. This will open a PDF in a new tab.

3. Download the PDF and save the file. This allows you to fill in the editable sections of the PDF document.
